INDEXES

Volume 1, 1972

INDEX OF AUTHORS

Baker, A. D., 355
Breslow, R., 553
Brundle, C. R., 355
Carabine, M. D., 411
Carless, H. A. J., 465
Chatt, J., 121
Corfield, G. C., 523
Coulson, E. H., 495
Coyle, J. D., 465
Fry, A., 163
Griffiths, J., 481
Grossert, J. S., 1
Groves, J. K., 73
Gutteridge, N. J. A., 381
Harmony, M. D., 211
Leigh, G. J., 121
Linford, R. G., 445
Lipscomb, W. N., 319
Mason, R., 431
Menger, F. M., 229
Mulheirn, L. J., 259
North, A. M., 49
Ramm, P. J., 259
Rattee, I. D., 145
Sutherland, R. G., 241
Thomas, T. W., 99
Thompson, M., 355
Tolman, C. A., 337
Underhill, A. E., 99
Waltz, W. L., 241
Whitfield, R. C., 27

INDEX OF TITLES

Acylation, Friedel-Crafts, of alkenes, 73
Alkenes, the Friedel-Crafts acylation of, 73
Atmosphere, interactions in, of droplets and gases, 411
Azobenzene and its derivatives, photochemistry of, 481

Biomimetic chemistry, 553
Biosynthesis of sterols, 259

Carbonyl compounds, photochemistry of, 465
Catalysis, homogeneous, and organometallic chemistry, the 16 and 18 electron rule in, 337
CENTENARY LECTURE. Biomimetic chemistry, 553
CENTENARY LECTURE. Three-dimensional structures and chemical mechanisms of enzymes, 319
Chemicals in rodent control, 381
Chemistry of dyeing, 145
Conformational studies on small molecules, 293
Cyclopolymerization, 523

Dielectric relaxation in polymer solutions, 49
Droplets and gases, interactions in the atmosphere of, 411
Dyeing, chemistry of, 145

Echinoderms, 1
Education, chemical, a reassessment of research in, 27
Electron spectroscopy, 355
Elimination reactions, isotope effect studies of, 163
Enzymes, three-dimensional structures and chemical mechanisms of, 319

Fixation, of nitrogen, 121
Friedel-Crafts acylation of alkenes, 73

Gases, and droplets, interactions in the atmosphere of, 411

Homogeneous catalysis, and organometallic chemistry, the 16 and 18 electron rule in, 337

Interactions in the atmosphere of droplets and gases, 411
Interactions, metal–metal, in transition-metal complexes containing infinite chains of metal atoms, 99
Isotope effect studies of elimination reactions, 163

Mechanisms, chemical, and three-dimensional structures of enzymes, 319
Metal–metal interactions in transition-metal complexes containing infinite chains of metal atoms, 99

Natural products from echinoderms, 1
Nitrogen fixation, 121

Organometallic chemistry and homogeneous catalysis, the 16 and 18 electron rule in, 337

Phase boundaries, reactivity of organic molecules at, 229
Photochemistry, of azobenzene and its derivatives, 481
——, of carbonyl compounds, 465
——, of transition-metal co-ordination compounds – a survey, 241
Polymer solutions, dielectric relaxation in, 49

Quantum mechanical tunnelling in chemistry, 211

Reactivity of organic molecules at phase boundaries, 229
Research in chemical education: a reassessment, 27
Rodent control, chemicals in, 381
16 and 18 Electron rule in organometallic chemistry and homogeneous catalysis, 337

Small molecules, conformational studies on, 293
Solids, surface energy of, 445
Some recent developments in chemistry teaching in schools, 495
Spectroscopy, electron, 355
Sterols, biosynthesis of, 259
Surface energy of solids, 445

Teaching, of chemistry in schools, some recent developments in, 495
Three-dimensional structures and chemical mechanisms of enzymes, 319
TILDEN LECTURE. Valence in transition-metal complexes, 431
Transition-metal complexes, containing infinite chains of metal atoms, metal–metal interactions in, 99
——, valence in, 431
Transition-metal co-ordination compounds, photochemistry of, 241

Valence in transition-metal complexes, 431
